

## Attachment 1: Listed species and communities of conservation significance

Plant species conservation status based on Barker *et al.* (2005) and regionally threatened communities based on Croft *et al.* (1999). Fish species conservation status at the State level is based on Hammer *et al.* (2007). Invertebrate species conservation status based on Sands and New (2002).

R = rare, V = vulnerable, E = endangered, CE = critically endangered, P = protected, LC = Least concern.

National = *Environment Protection and Biodiversity Conservation Act 1999*, State = *National Parks and Wildlife Act 1972*.
