

## Additional information to **4CA010**

The wetland type for seasonal freshwater ponds is **Ts**, not **Ss**. Besides this, the wetland types **M**, permanent freshwater rivers, and **Vt**, tundra wetlands, apply according to the “physical features” and “ecological features” sections.

Criteria: 1a, 1c, 2b, 2c, 3a, 3b, 3c

Justification of 3c: the area regularly supports over 1% of the populations of the species *Melanitta fusca*, *Anas acuta*, *Anas americana* and *Aythya valisineria*.  
(derived from Waterfowl Population Estimates II)

The site falls under IUCN category Ib  
(Taken from the WCMC web database at:
