

## Additional information to **4CA014**

The wetland type for permanent freshwater marshes is **Tp**, not Sp. Additionally, type **M**, permanent freshwater rivers, is applicable according to a former RIS.

Criteria: 1a, 2c, 3a, 3b, 3c

Justification of all criteria except 1a:

The reserve is a nesting site for over 163000 pairs of lesser snow goose *Anser caerulescens caerulescens*, which is over 7% of the breeding population, and also for substantial numbers of Canada goose *Branta canadensis*.

The site falls under IUCN category IV.
