

Additional information to **4CA015**

The wetland type for permanent freshwater marshes is **Tp**, not Sp. Additionally, type **M**, permanent freshwater rivers and streams, is applicable according to the “physical features” section and the map.

Criteria: 1a, 2b, 2c, 3a, 3b, 3c

Justification of criterion 3c:

The reserve is a critical summer nesting area for up to one million migratory birds, particularly lesser snow goose *Anser caerulescens caerulescens*, with over 10% of the breeding population.

The site falls under IUCN category IV.
