

Additional information to **4CA031**

According to the official acknowledgement, the designation date for this site is 10 June 1993. It has been in the database as 8 June for a long time, but that was incorrect. The official letter is in the hardcopy sitefile. (The RIS states the correct date).

Criteria: 1b, 2a, 3b

Justification of criterion 2a:

Tabusintac Lagoon is a nesting site for the globally threatened wader *Charadrius melodus*.

The site does not fall under any IUCN category.
