

Additional information to **4CA032**

The designation date for Creston Valley is 21 February 1994, according to the official designation letter from the Bureau (the RIS erroneously says 22 Feb).

In addition to the wetland types already mentioned on the RIS, type **Tp**, permanent freshwater marshes, and type **4**, seasonally flooded agricultural land, apply to this site. Justification can be found in the sections "ecological features" and "land use at the site".

Criteria: 1c, 2c, 3a, 3b

The RIS lists several plant and animal species as "vulnerable" or "rare", none of them could be confirmed by the IUCN Red Data lists for plants and animals.

The site falls under IUCN category IV.
