

Additional information to **4CA035**

The geographical coordinates on the newest RIS (1999) are wrong, the latitude should be 44°44'N as on the older RIS (40°44'N is situated in the USA).

Besides the wetland types on the RIS, type **Tp**, permanent freshwater marshes, also occurs. Justification can be found in the "overview" section.

Criteria: 1a, 1c, 2b, 2c, 3b

These criteria are explicitly stated in a separate document in the sitefile.

The site falls under IUCN category IV.
