

# Ramsar Information Sheet

Published on 8 May 2023

Update version, previously published on : 8 March 2018

## Norway Kvisleflået

Designation date	6 August 2002
Site number	1193
Coordinates	61°48'25"N 12°06'11"E
Area	5 682,00 ha

## Color codes

Fields back-shaded in light blue relate to data and information required only for RIS updates.

Note that some fields concerning aspects of Part 3, the Ecological Character Description of the RIS (tinted in purple), are not expected to be completed as part of a standard RIS, but are included for completeness so as to provide the requested consistency between the RIS and the format of a 'full' Ecological Character Description, as adopted in Resolution X.15 (2008). If a Contracting Party does have information available that is relevant to these fields (for example from a national format Ecological Character Description) it may, if it wishes to, include information in these additional fields.

## 1 - Summary

### Summary

The site is a large, flat mire area bordering Sweden in Engerdal. Several large and flat mire expanses occur, although it is more typical with poorer small mires and low pine-covered knolls. Birch *Betula* grows at the edge of the mires as well as along rivers and streams. The area is dominated by numerous small pools and ponds. Within the mire, a series of moraine ridges run south-east to north-west. In the southern part, we find old forest of mainly spruce and some birch.

Kvisleflået is an important area for wetland birds, with 20-30 breeding species recorded. The mosaic landscape is ideal for the greenshank *Tringa nebularis* and the whimbrel *Numenius phaeopus*. After the ice melts in the spring, several duck species stage on route to upland breeding sites around the reserve. Several regionally uncommon species breed, or are suspected to have bred, in the reserve including the whooper swan *Cygnus cygnus*, the bean goose *Anser fabalis*, the broad-billed sandpiper *Limicola falcinellus* and the jack snipe *Lymnocyptes minimus*.

## 2 - Data & location

### 2.1 - Formal data

#### 2.1.1 - Name and address of the compiler of this RIS

##### Responsible compiler

Institution/agency

Postal address

##### National Ramsar Administrative Authority

Postal address

#### 2.1.2 - Period of collection of data and information used to compile the RIS

From year

To year

#### 2.1.3 - Name of the Ramsar Site

Official name (in English, French or Spanish)

#### 2.1.4 - Changes to the boundaries and area of the Site since its designation or earlier update

(Update) A. Changes to Site boundary Yes  No

(Update) B. Changes to Site area No change to area

(Update) For secretariat only: This update is an extension

#### 2.1.5 - Changes to the ecological character of the Site

(Update) 6b i. Has the ecological character of the Ramsar Site (including applicable Criteria) changed since the previous RIS? No

## 2.2 - Site location

### 2.2.1 - Defining the Site boundaries

#### b) Digital map/image

<1 file(s) uploaded>

Former maps

#### Boundaries description

### 2.2.2 - General location

a) In which large administrative region does the site lie?

b) What is the nearest town or population centre?

### 2.2.3 - For wetlands on national boundaries only

a) Does the wetland extend onto the territory of one or more other countries? Yes  No

b) Is the site adjacent to another designated Ramsar Site on the territory of another Contracting Party? Yes  No

### 2.2.4 - Area of the Site

Official area, in hectares (ha):

Area, in hectares (ha) as calculated from  
GIS boundaries

5683.655

## 2.2.5 - Biogeography

### Biogeographic regions

Regionalisation scheme(s)	Biogeographic region
EU biogeographic regionalization	1. Boreal
Other scheme (provide name below)	2. Northern boreal vegetation zone, transitional zone (Nb-OC)

### Other biogeographic regionalisation scheme

1. Biogeographical regions of Europe, European Environment Agency, 2005

2. Zonal division showing the variation in vegetation from south to north and from the lowlands to the mountains, and sectional graduation showing the variation between the coast and inland (In: Moen, A. 1998. Nasjonalatlas for Norge; vegetasjon. Statens kartverk, Hønefoss).

### 3 - Why is the Site important?

#### 3.1 - Ramsar Criteria and their justification

- Criterion 1: Representative, rare or unique natural or near-natural wetland types

Other ecosystem services provided

Other reasons

- Criterion 2 : Rare species and threatened ecological communities

- Criterion 3 : Biological diversity

Justification

- Criterion 4 : Support during critical life cycle stage or in adverse conditions

#### 3.2 - Plant species whose presence relates to the international importance of the site

Phylum	Scientific name	Criterion 2	Criterion 3	Criterion 4	IUCN Red List	CITES Appendix I	Other status	Justification
<b>Fungi</b>								
BASIDIOMYCOTA/ AGARICOMYCETES	<i>Amylocystis lapponicus</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>	National Red List: Considered as VU	
ASCOMYCOTA/ NOT ASSIGNED	<i>Chaenotheca laevigata</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>	National Red List: Considered as VU	
ASCOMYCOTA/ NOT ASSIGNED	<i>Chaenotheca phaeocephala</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>	National Red List: Considered as VU	
BASIDIOMYCOTA/ AGARICOMYCETES	<i>Crustoderma dryinum</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>	National Red List: Considered as VU	
ASCOMYCOTA/ LECANOROMYCETES	<i>Cyphelium inquinans</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>	National Red List: Considered as VU	
ASCOMYCOTA/ LECANOROMYCETES	<i>Cyphelium karelicum</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>	National Red List: Considered as VU	
BASIDIOMYCOTA/ AGARICOMYCETES	<i>Diplomitoporus crustulinus</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>	National Red List: Considered as VU	
BASIDIOMYCOTA/ AGARICOMYCETES	<i>Gloeophyllum protractum</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>	National Red List: Considered as VU	
BASIDIOMYCOTA/ AGARICOMYCETES	<i>Laurilia sulcata</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>	National Red List: Considered as VU	
BASIDIOMYCOTA/ AGARICOMYCETES	<i>Perenniporia subacida</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>	National Red List: Considered as EN	
BASIDIOMYCOTA/ AGARICOMYCETES	<i>Skeletocutis chrysella</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>	National Red List: Considered as VU	
BASIDIOMYCOTA/ AGARICOMYCETES	<i>Skeletocutis odora</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>	National Red List: Considered as VU	
BASIDIOMYCOTA/ AGARICOMYCETES	<i>Skeletocutis stellae</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>	National Red List: Considered as VU	

Protection status is given according to the National Red List 2021.

### 3.3 - Animal species whose presence relates to the international importance of the site

Phylum	Scientific name	Species qualifies under criterion				Species contributes under criterion				Pop. Size	Period of pop. Est.	% occurrence 1)	IUCN Red List	CITES Appendix I	CMS Appendix I	Other Status	Justification
		2	4	6	9	3	5	7	8								
<b>Others</b>																	
CHORDATA/MAMMALIA	<i>Gulo gulo</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>				LC	<input type="checkbox"/>	<input type="checkbox"/>	National Red List: Considered as EN	
CHORDATA/MAMMALIA	<i>Lynx lynx</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>				LC	<input type="checkbox"/>	<input type="checkbox"/>	National Red List: Considered as EN	
CHORDATA/MAMMALIA	<i>Ursus arctos</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>				LC	<input checked="" type="checkbox"/>	<input type="checkbox"/>	National Red List: Considered as EN	
<b>Birds</b>																	
CHORDATA/AVES	<i>Anas crecca</i>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>				LC	<input type="checkbox"/>	<input type="checkbox"/>		Criterion 4: This species breeds at the site.
CHORDATA/AVES	<i>Anser fabalis</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>				LC	<input type="checkbox"/>	<input type="checkbox"/>	National Red List: Considered as EN	Criterion 3: This species is observed from time to time in the area.
CHORDATA/AVES	<i>Aythya fuligula</i>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>				LC	<input type="checkbox"/>	<input type="checkbox"/>		Criterion 4: This species breeds at the site.

1) Percentage of the total biogeographic population at the site

Protection status is given according to the National Red List 2021.

### 3.4 - Ecological communities whose presence relates to the international importance of the site

<no data available>

## 4 - What is the Site like? (Ecological character description)

### 4.1 - Ecological character

Characteristic for the area is a mosaic of small nutrient-poor mires, and low pine-clad knolls, as well as large open mire areas such as at Storkjølen and Rådløskjølen. The vegetation varies from nutrient-poor mire/intermediate mire vegetation, low pine woods on the moraine ridges and willow Salix- swamp woodland with some birch Betula along rivers and edges of mires. A substantial part of the forest is old forest/natural forest, With a very high diversity of nationally Red-Listed fungi and lichen species connected to this forest type. In places there are areas of wet mixed woodland with characteristics resembling ancient woodland. The many pools in the area are important for birdlife, although they have little aquatic vegetation. The birdlife includes a good representation of breeding waterbirds - albeit in small numbers.

### 4.2 - What wetland type(s) are in the site?

#### Inland wetlands

Wetland types (code and name)	Local name	Ranking of extent (1: greatest - 4: least)	Area (ha) of wetland type	Justification of Criterion 1
Fresh water > Flowing water >> L: Permanent inland deltas		0		
Fresh water > Flowing water >> M: Permanent rivers/ streams/ creeks				
Fresh water > Lakes and pools >> O: Permanent freshwater lakes		4		
Fresh water > Lakes and pools >> Tp: Permanent freshwater marshes/ pools		3		Representative
Fresh water > Lakes and pools >> Ts: Seasonal/ intermittent freshwater marshes/ pools on inorganic soils		0		
Fresh water > Marshes on peat soils >> U: Permanent Non-forested peatlands		1		Representative
Fresh water > Marshes on inorganic soils >> Xf: Freshwater, tree-dominated wetlands		2		
Fresh water > Marshes on peat soils >> Xp: Permanent Forested peatlands		0		

### 4.3 - Biological components

#### 4.3.1 - Plant species

Other noteworthy plant species

Phylum	Scientific name	Position in range / endemism / other
ASCOMYCOTA/LECANOROMYCETES	<i>Alectoria sarmentosa</i>	National Red List: Considered as NT
BASIDIOMYCOTA/AGARICOMYCETES	<i>Antrodia albobrunnea</i>	National Red List: Considered as NT
BASIDIOMYCOTA/AGARICOMYCETES	<i>Antrodia xantha</i>	National Red List: Considered as LC
ASCOMYCOTA/LECANOROMYCETES	<i>Bryoria nadvornikiana</i>	National Red List: Considered as NT
ASCOMYCOTA/NOT ASSIGNED	<i>Chaenotheca subroscida</i>	National Red List: Considered as NT
BASIDIOMYCOTA/AGARICOMYCETES	<i>Chaetoderma luna</i>	National Red List: Considered as NT
BASIDIOMYCOTA/AGARICOMYCETES	<i>Chaetodermella luna</i>	National Red List: Considered as NT
ASCOMYCOTA/LECANOROMYCETES	<i>Cladonia parasitica</i>	National Red List: Considered as NT
BASIDIOMYCOTA/AGARICOMYCETES	<i>Crustoderma corneum</i>	National Red List: Considered as VU
BASIDIOMYCOTA/AGARICOMYCETES	<i>Cystostereum murrayi</i>	National Red List: Considered as LC
BASIDIOMYCOTA/AGARICOMYCETES	<i>Fomitopsis rosea</i>	National Red List: Considered as NT
TRACHEOPHYTA/LILIOPSIDA	<i>Gymnadenia conopsea</i>	National Red List: Considered as LC
ASCOMYCOTA/LECANOROMYCETES	<i>Hypogymnia bitteri</i>	National Red List: Considered as NT
BASIDIOMYCOTA/AGARICOMYCETES	<i>Inonotus leporinus</i>	National Red List: Considered as NT
ASCOMYCOTA/LECANOROMYCETES	<i>Letharia vulpina</i>	National Red List: Considered as NT
ASCOMYCOTA/NOT ASSIGNED	<i>Microcalicium ahlneri</i>	National Red List: Considered as NT
BASIDIOMYCOTA/AGARICOMYCETES	<i>Odonticum romellii</i>	National Red List: Considered as NT
BASIDIOMYCOTA/AGARICOMYCETES	<i>Phlebia mellea</i>	National Red List: Considered as NT
ASCOMYCOTA/NOT ASSIGNED	<i>Pseudographis pinicola</i>	National Red List: Considered as LC
BASIDIOMYCOTA/AGARICOMYCETES	<i>Pseudomerulius aureus</i>	National Red List: Considered as NT
BASIDIOMYCOTA/AGARICOMYCETES	<i>Skeletocutis borealis</i>	National Red List: Considered as DD
BASIDIOMYCOTA/AGARICOMYCETES	<i>Trichaptum laricinum</i>	National Red List: Considered as NT

#### 4.3.2 - Animal species

##### Other noteworthy animal species

Phylum	Scientific name	Pop. size	Period of pop. est.	% occurrence	Position in range /endemism/other
CHORDATA/AVES	<i>Cuculus canorus</i>				Possibly breeding at the site. National Red List Status: NT
CHORDATA/AVES	<i>Pluvialis apricaria</i>				Possibly breeding on the site.
CHORDATA/AVES	<i>Tringa totanus</i>				Possibly breeding on the site.

## 4.4 - Physical components

### 4.4.1 - Climate

Climatic region	Subregion
D: Moist Mid-Latitude climate with cold winters	Dfc: Subarctic (Severe winter, no dry season, cool summer)

The climate is slightly continental with rather a lot of precipitation (ca. 700 mm p.a.) and relatively warm, but short, summers and extremely cold winters.

### 4.4.2 - Geomorphic setting

a) Minimum elevation above sea level (in metres)

a) Maximum elevation above sea level (in metres)

Entire river basin

Upper part of river basin

Middle part of river basin

Lower part of river basin

More than one river basin

Not in river basin

Coastal

Please name the river basin or basins. If the site lies in a sub-basin, please also name the larger river basin. For a coastal/marine site, please name the sea or ocean.

The mire belongs to the catchement area Dalelven, and it drains into the river Dalelven in Sweden.

### 4.4.3 - Soil

Mineral

(Update) Changes at RIS update No change  Increase  Decrease  Unknown

Organic

(Update) Changes at RIS update No change  Increase  Decrease  Unknown

No available information

Are soil types subject to change as a result of changing hydrological conditions (e.g., increased salinity or acidification)? Yes  No

Please provide further information on the soil (optional)

Peat soils dominate in the large areas of mires, although the moraine ridges with pine *Pinus sylvestris* woodland contain mineral soils.

### 4.4.4 - Water regime

#### Water permanence

Presence?	Changes at RIS update
Usually permanent water present	

#### Source of water that maintains character of the site

Presence?	Predominant water source	Changes at RIS update
Water inputs from surface water	<input type="checkbox"/>	No change
Water inputs from precipitation	<input type="checkbox"/>	No change

#### Stability of water regime

Presence?	Changes at RIS update
Water levels largely stable	No change

Please add any comments on the water regime and its determinants (if relevant). Use this box to explain sites with complex hydrology:

The water levels in the mire areas is rather permanent and stable. Large mires such as this are important water reservoirs. They provide stability in water drainage in the watercourse by acting as reservoirs in drought periods and as flood barriers during snow melt and periods of heavy precipitation.

### 4.4.5 - Sediment regime

Sediment regime unknown

4.4.6 - Water pH

Unknown

4.4.7 - Water salinity

Fresh (<0.5 g/l)

(Update) Changes at RIS update No change  Increase  Decrease  Unknown

Unknown

4.4.8 - Dissolved or suspended nutrients in water

Mesotrophic

(Update) Changes at RIS update No change  Increase  Decrease  Unknown

Unknown

Please provide further information on dissolved or suspended nutrients (optional):

Most of this is nutrient poor basement granite as well as some areas of Cambrosilurian bedrocks in the south-west.

4.4.9 - Features of the surrounding area which may affect the Site

Please describe whether, and if so how, the landscape and ecological characteristics in the area surrounding the Ramsar Site differ from the site itself: i) broadly similar  ii) significantly different

Surrounding area has greater urbanisation or development

Surrounding area has higher human population density

Surrounding area has more intensive agricultural use

Surrounding area has significantly different land cover or habitat types

Please describe other ways in which the surrounding area is different:

Forestry is important in the area.

4.5 - Ecosystem services

4.5.1 - Ecosystem services/benefits

Provisioning Services

Ecosystem service	Examples	Importance/Extent/Significance
Food for humans	Sustenance for humans (e.g., fish, molluscs, grains)	Low
Wetland non-food products	Livestock fodder	Medium

Regulating Services

Ecosystem service	Examples	Importance/Extent/Significance
Hazard reduction	Flood control, flood storage	Medium

Cultural Services

Ecosystem service	Examples	Importance/Extent/Significance
Recreation and tourism	Recreational hunting and fishing	Low

Supporting Services

Ecosystem service	Examples	Importance/Extent/Significance
Nutrient cycling	Carbon storage/sequestration	Medium

Other ecosystem service(s) not included above:

Large mires such as this are important water reservoirs. They provide stability in water drainage in the watercourse by acting as reservoirs in drought periods and as flood barriers during snow melt and periods of heavy precipitation.

Some berry picking (in particular cloudberry) takes place, as well as hunting and fishing.

There is limited hobby fishing and hunting within the area. Domestic livestock graze the area – mainly sheep although also some cattle.

Have studies or assessments been made of the economic valuation of ecosystem services provided by this Ramsar Site? Yes  No  Unknown

4.5.2 - Social and cultural values

i) the site provides a model of wetland wise use, demonstrating the application of traditional knowledge and methods of management and use that maintain the ecological character of the wetland

ii) the site has exceptional cultural traditions or records of former civilizations that have influenced the ecological character of the wetland

iii) the ecological character of the wetland depends on its interaction with local communities or indigenous peoples

iv) relevant non-material values such as sacred sites are present and their existence is strongly linked with the maintenance of the ecological character of the wetland

<no data available>

#### 4.6 - Ecological processes

<no data available>

## 5 - How is the Site managed? (Conservation and management)

### 5.1 - Land tenure and responsibilities (Managers)

#### 5.1.1 - Land tenure/ownership

##### Private ownership

Category	Within the Ramsar Site	In the surrounding area
Other types of private/individual owner(s)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Provide further information on the land tenure / ownership regime (optional):

within the Ramsar site: Private  
in the surrounding area: Private

#### 5.1.2 - Management authority

Please list the local office / offices of any agency or organization responsible for managing the site:

County governor of Innlandet

Postal address:

Statsforvalteren i Innlandet  
Pb. 987  
N-2604 LILLEHAMMER

E-mail address:

sfinpost@statsforvalteren.no

## 5.2 - Ecological character threats and responses (Management)

### 5.2.1 - Factors (actual or likely) adversely affecting the Site's ecological character

Please describe any other threats (optional):

within the Ramsar site:  
None known. Grazing intensity from livestock is low and has little or no impact on the vegetation.

in the surrounding area: None known.

#### 5.2.2 - Legal conservation status

##### National legal designations

Designation type	Name of area	Online information url	Overlap with Ramsar Site
Nature Reserve	Kvisleflået		whole

#### 5.2.3 - IUCN protected areas categories (2008)

Ia Strict Nature Reserve

Ib Wilderness Area: protected area managed mainly for wilderness protection

II National Park: protected area managed mainly for ecosystem protection and recreation

III Natural Monument: protected area managed mainly for conservation of specific natural features

IV Habitat/Species Management Area: protected area managed mainly for conservation through management intervention

V Protected Landscape/Seascape: protected area managed mainly for landscape/seascape conservation and recreation

VI Managed Resource Protected Area: protected area managed mainly for the sustainable use of natural ecosystems

#### 5.2.4 - Key conservation measures

##### Legal protection

Measures	Status
Legal protection	Implemented

Other:

The reserve was expanded in 2005 (increased to 5682 ha).

Conservation measures proposed but not yet implemented:

The area borders a similar wetland area (Ramsar site) on the Swedish side of the border. There have been some initial efforts to coordinate the management of the transfrontier conservation area.

### 5.2.5 - Management planning

Is there a site-specific management plan for the site? In preparation

Has a management effectiveness assessment been undertaken for the site? Yes  No

If the site is a formal transboundary site as indicated in section Data and location > Site location, are there shared management planning processes with another Contracting Party? Yes  No

### 5.2.6 - Planning for restoration

Is there a site-specific restoration plan? No need identified

### 5.2.7 - Monitoring implemented or proposed

<no data available>

## 6 - Additional material

### 6.1 - Additional reports and documents

#### 6.1.1 - Bibliographical references

Artsdatabanken (2021, 24. november). Norsk rødliste for arter 2021. <https://www.artsdatabanken.no/lister/rodlisterforarter/2021>

#### Botanical and management plans:
